

# Our Offer

## IT-Management

IT management optimizes processes through automation and better resource utilization. It minimizes risks such as cyberattacks and data loss, strengthens business continuity, and enables the control of IT costs through strategic planning and monitoring.

### Our focus areas:

- Compliance & Governance (NIS-2, MaRisk, BAIT, VAIT, DORA, EBA, etc.)
- Outsourcing Management
- IT Process Design & Implementation (ITIL, CoBit)
- Business Continuity Management
- Project Management (PMO), IT Strategy & Quality Management
- Lean Agile Project Management (SAFe, Kanban, etc.)

Work more efficiently, securely, and cost-effectively through targeted IT management.

## Infrastructure

The IT infrastructure is the foundation for agility and productivity, which also makes it a target for cyberattacks.

Our goal: To protect your infrastructure according to international standards.

### Our focus areas:

- GAP analyses & redesign in system and network engineering, including ISMS (BSI/ISO IEC 27001), BSI Basic Protection, NIS-2, DORA, BAIT, VAIT
- GDPR compliance
- IT-Security/Cybersecurity (Firewall, SIEM)
- Vulnerability Management
- Cloud Computing/Integration
- Mobile Device Management

With us, you build a future-proof and resilient IT environment!

## Sourcing

External resources in IT recruiting provide access to a larger talent pool and specialized expertise. With aPrio1, you also benefit from our network and extensive experience in the IT industry.

### Our models:

- Consultants or Freelancer
- Placement based on package price/team provision
- Employee leasing
